Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 September 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

The amendment and remarks filed on 9/19/07 have been acknowledged and entered.

Specification

1. The abstract of the disclosure is objected to because at line 7, "can be had thereto" is indefinite and confusing term. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 36-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 36 is indefinite in the recitation of A second part of an identification system, because there is no antecedent basis for the identification system, and also because there is no first part has been recited.

4. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 20-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 10039408 (DE'408) or WO 0032864 (WO'864) or GB 2134078 (GB'078) in combination with DE (EP'927).

Re claims 20-41, DE'408 discloses that the domestic washing machine has the amount of detergent from a dispenser (1) weighed (2) and product bar code readings (6) registered by a computer (3) to control the machine (7). Visual (4) and acoustic (5) indication is provided and the optimum amount of Product is supplied. See the Figure, and applicant statement in the IDS.

WO'864 relates to a method for controlling a washing machine, to a control unit for carrying out the method, and to a washing machine containing this control unit , whereby at least one of the washing program is controlled according to information which is read by at least one external data carrier. See the abstract.

GB'078 discloses a control data input into metering and supply apparatus for washing and rinsing agents. See the abstract, claims 1-3,13, 24-25, and page 2, lines 10-130, and Figs. 2-4.

7. DE'408 or WO'864 or GB'078 does not teach the dosing device as claimed.

Re claims 25 and 36-38, see EP'927, col. 9, lines 8-23, and the claims.

It would have been obvious for one skilled in the art to use the dosing device taught by EP'927 in the DE'408 or WO'864 or GB'078 to obtain the claimed invention, because it is well known in the art to use the dosing device in the appliance for treating laundry or dishes.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to adjust the time of dispensing the treatment agent from the dosing device during treatment of the objects to obtain optimum results, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Response to Arguments

Applicant's arguments with respect to claims 20-41 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any
